

Advantage ICF UNIVERSITY

Better building ideas from PFB 

What is Advantage University?

Advantage ICF
UNIVERSITY
Better building ideas from PFB

Advantage ICF University was developed to share the knowledge and expertise of those experienced in the ICF Industry to educate builders, architects, and homeowners on the benefits, best practices, and problem solving techniques they have obtained over the years.

With a Hands-on, How-to, and open-style, the seminar is dedicated to involving the participants in all phases of construction and the process of Building with ICFs.

Contact Us to find the next available seminar in your area.

Darren Graff

Darren comes to us with a wealth of valuable experience. Having worked for a respected home builder in the Edmonton area, which is focused on building energy efficient homes utilizing ICF's, he has used our Advantage ICF products extensively and will bring a builder's perspective to the use of Advantage ICF. He has also worked as a certified Energy Advisor with NRCan. and was involved in the initial branch start-up for a company in the Edmonton area providing Home energy assessments. These assessments provided home owners information on energy efficiency within the residential industry. Darren is always happy to help out and find the right information for any of your construction insulation needs.

Greg Doren

Greg has over 20 years of experience in the ICF industry, and has built/supervised hundreds of residential and commercial ICF projects all over North America. In 1994 he co-founded AAB Building System Alberta Ltd. an ICF distributor/construction company dedicated to the growth of ICF building through training and service. In 1996 he then designed and developed Advantage Insulating Concrete Forms. Greg participate in numerous panels and committees to promote ICF Construction as the premier building technique. He has developed ICF industry training programs for colleges, presenting proper building practices across Canada.

Greg has been a member of the Alberta Ready Mix Concrete Association Board, and is currently a member of the Residential Committee, a member of the Canadian Home Builders Association – Calgary region, and also on the Southern Alberta Institute of Technology Advisory Committee for Architectural Technologist Program
